DETAILED ACTION

Allowable Subject Matter

1. Claims 1-13 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:
The closest prior art shows the color conversion process with the tristimulus values (RGB) being converted to YMC but does not disclose an apparatus for determining a color conversion characteristic comprising: a color conversion unit for performing color conversion on input image data based on the conversion characteristic stored in a holding unit, and outputting the converted image data to a image display unit, wherein the color conversion unit selects a color conversion candidate, wherein the color conversion unit calculates predicted tristimulus values based on predicted color data, wherein the color conversion unit evaluates the predicted tristimulus values based on measured tristimulus values and the selected color conversion candidate, and wherein the color conversion unit determines, on the basis of the evaluation of the predicted tristimulus values, whether or not the color conversion candidate that was selected is stored in the holding unit as the conversion characteristic.
